SPRING 2026 BEEF

SIRE DIRECTORY

Profit from Genetic Progress

One bull does not fit all.

Most popular on an industry index list isn't always synonymous with what's best for your herd. Your genetic selection shouldn't be based on industry popularity, but rather on what drives your success and reduces your challenges.

Find what's best for your herd with ABS.

One bull does not fit all. What's important to you? That really is the focus of this year's sire directory. Your objectives and the direction you want to take your herd in is not and should not be the same for every producer. As we present the ABS lineup, our goal is to put bulls into groups that may address some of the more common wants and needs. **We strive to have a broad lineup with multiple options for customers**, because even if you have the same wants, you may desire it in a little different package. We hope you find the new bull presentation method helpful in finding solutions for your operation.

We have more opportunity than ever to change the genetic trajectory of a herd through applied reproductive technologies, breeding strategies, and genetics. How we choose to utilize these tools will have a huge impact on meeting consumer demand for quality beef and being competitive in a global marketplace. The industry will be challenged to provide more high-quality protein to a growing marketplace with fewer cows. Our ability to do that efficiently is greater today, yet we still have so much more room to utilize the tools available.

It is an exciting and challenging time to be part of the beef industry. We are looking forward to some of the smallest calf crops ever but also some of the strongest demand we have seen. The value of beef and all classes of cattle creates an industry where decisions really determine the success of your outcomes. Genetics set the stage of opportunity for any calf–are we making calves that can succeed in today's market? **The calves we build today will become the fed cattle and the yearling bulls for sale in 2028**. The impact of the maternal base for our future cowherds will be long beyond that. Are we creating cattle that will fill those needs? We would love to help you with your genetic decisions to set you up for greater profitability.

TITAN

BURGETT TITAN | 29AN2367
Owned by: ABS Global, Inc, WI; Knoll Crest Farms, VA; Burgett Angus, OH

AAA 20876853
Born: 3/1/23

Sire - Woodhill COMSTOCK

A TITAN OF THE ANGUS INDUSTRY

- The next step in the COMSTOCK sire line with more overall performance
- Has been a tremendous herd sire in the pastures of Knoll Crest Farms the past year
- Should calve as easy as his sire, but lift them up with more size, scale and added frame along with more weaning and yearling performance
- Improves on his sires already top tier FL EPD to be in the top 1% and brings additional Marbling and $Combined
- His dam has made PATHFINDER and is easy to admire for her overall kind–her feet, structure and udder are right for the modern times

LUCCHESE

RC LUCCHESE L101 | 29AN2339

Owned by: Rock Creek Angus, AR; Gartner-Denowh Angus Ranch, MT; Baldridge Performance Angus, NE; AI & Jeanne Conover, IA; ABS Global, Inc., WI

AAA 20827851
Born: 2/15/23

Daughter - GDAR Pamela 5433, Gartner-Denowh Angus Ranch, MT

Sire - Tehama PATRIARCH F028

CRAFTSMANSHIP, LEGACY, & INNOVATION

- LUCCHESE is the Heir Apparent, prepared to assume the throne from his legendary sire PATRIARCH
- In a word, Additive. Added performance, added end product, added maternal and $Maternal, added phenotype and added docility
- The maternal side of his pedigree brings absolutely everything Gartner-Denowh and the GDAR prefix imply in terms of form and function–they are the right kind
- LUCCHESE stands on a big sound foot for a calving ease bull with added bone and substance. A nice patterned bull that is easy to look at and won't sacrifice shape density and base width. His docility is second to none

PROOF OF A BREEDING PROGRAM

- A featured highlight of the record setting 2025 Lindskov's LT bull sale
- A calving ease bull that can fix scrotal, heifer pregnancy, feet and PAP–also posts a +111 $M and +352 $C
- The LT Elite Lady tribe stacks generations of ideal udders, feet and maternal performance, there are decades of maternal greatness bred in this cowherd
- His dam has been the talk of the Angus industry as astute breeders easily find her in pasture tours at the Thiel Ranch with cattlemen from around the globe noting her as a great one
- Standing on great feet and structure, you will love the degree of masculinity, body, flesh and thickness this young stud displays

THE PERFECT GAME MANAGER FOR YOUR BREEDING PROGRAM

- A sire to that typifies PASTURE TO PLATE GENETICS with one of the most ideal EPD profiles we've seen all year
- He has the credential to supply the industry with the ideal, highly maternal replacement female, yet sons will be profitable in the feedlot and on the rail
- His No Excuses EPD tabulation ranks in the best quartile for the breed for 21 traits and indexes
- His mother is the kind that brings believers to the party for TRUE NORTH daughters
- A masculine young man with a herd bull look. Grounded with impeccable structure, and shows genuine body shape and softness

BRAZEN

SIMPLY AUDACIOUS

- Lead-off and high selling bull of the Ellingson Angus 2025 bull sale
- Arguably one of the most complete data and phenotype total package individuals raised in the Ellingson program
- His data profile and paperwork reads to a genuine balance without sacrifice where you will love the performance and maternal capabilities
- His young donor dam is a flush sister to Open Range and a daughter of the prolific donor EA Bells Girl 2181
- A true herd bull presence combining a powerful rib cage and hip with superior body width and softness

A COWBOY'S REPUBLIC

- Arguably the most powerful son of PLUS ONE in the industry, and is writing his own page in history
- Consistently stamping his progeny with extra body, fleshing ability and muscle density in a calving ease, moderate sized package.
- Cut from the same mold as our long-time top seller, PATRIARCH in terms of phenotypic quality, fleshing ability and complete data profile
- A cow family that is all things fertility, his dam is the foundation and paternal grandam to the elite $Maternal sire Sitz Logo
- Sons are topping sales across the country and his daughters are the right kind!

MAKE MATINGS WITH INTENT

Your Beef Breeding Checklist

When it comes to fertility, many factors contribute to your overall pregnancy success. Factors like animal health, nutrition, stress, semen handling and fertility, and adherence to estrus synchronization guidelines are all associated with pregnancy outcomes. Therefore, it's your responsibility to manage as many of these factors as possible in order to achieve the greatest pregnancy rates during your breeding season.

With tools like artificial insemination and synchronization, you can create a better, more uniform calf crop and improve a herd's longevity. While biology is a large factor, use this checklist to think through your breeding season procedures and ensure you are doing everything in your power to promote better pregnancy rates.

The most profitable thing a beef producer can manage is reproduction.

1. Make sure females are on a good mineral program that supports any potential deficiencies they might have.
2. Confirm bulls have undergone a breeding soundness exam approximately 30 to 60 days before they will be turned out with females.
3. Have females vaccinated at least 45 days prior to the day of AI *(Perry et al., 2018)*.
4. Make sure females are in a good body condition and plane of nutrition prior to artificial insemination (AI).
5. Plan your estrus synchronization protocol in advance.
6. Stick to using tried and tested protocols on the Beef Reproduction Task Force (BRTF) protocol sheets.
7. Ensure you have the correct needle length for the specific route of drug administration.
   - For intramuscular injections, 1 ½ inch or 18-gauge
   - For subcutaneous injections, ½ to ¾ inch or 16- or 18-gauge
8. Confirm you are administering the correct drug on the correct day according to the specific synchronization protocol.
9. Store your synchronization drugs when not in use according to the label specifications and make sure to keep them out of the sun when using them in the field.
10. Be as clean as possible when inserting CIDRs to avoid infections.
11. Keep stress to a minimum during the breeding season and after.
    - Promote low-stress handling amongst all those working the cattle.
    - Avoid sudden environmental changes without supplementation.
12. Transport females within four days after AI or wait at least 45 days to do so *(Harrington et al. 1995 and Merrill et al. 2007)*.
13. Use pregnancy diagnosis as a tool to be able to cull non-pregnant females sooner.
14. Maintain good herd records to keep track of which females perform better than others.
15. Remember to order synchronization drugs and semen early so you are guaranteed to have it when you need it.

To boost efficiency in your cowherd and generate revenue from a successful reproduction program, contact your local ABS Representative today!

KEYSTONE

SOLIDIFY YOUR GENETIC BASE WITH KEYSTONE

- 2023 Basin Angus Ranch top seller and maternal brother to the record-setting JAMESON
- All-around performance sire that is good footed and moderate framed with exceptional volume and mass
- Strong $Maternal sire that is a home run for maternal convenience traits including Docility, Foot Quality, PAP, Hair Shedding and Maternal Calving Ease

Express Ranches, OK

Daughter - Deer Valley Linda 4310,
Four Sons Farm, KY

THE LEGEND CONTINUES TO GROW

- Montana record setter and the most unique herd sire ever produced at Basin Angus
- Absolutely unequaled in the breed today for combined performance, foot quality and end product value
- Exceptionally long bodied, strong topped, deep in the fore rib, and correct in his foot and leg structure
- Progeny continue to light up the sale reports and the first wet daughters are doing the right things from the start.
- Top end $Maternal genetics backed by the proven and time-tested Basin Joy cow family that has also produced Basin Rainmaker 4044 and Basin Safe Deposit

IDENTIFIED AND HIGHLY QUALIFIED

- Unparalleled high-accuracy, proven sire for a combination of $Maternal and $Combined indexes
- High customer satisfaction sire with the data and phenotype that can compete with the most elite bulls in the breed today
- Ranks among the best proven sires in the breed for $Combined index but few others have the top end $Maternal index that takes him to another level
- Built on exceptional foundation traits including strong Foot Quality, Docility and Hair Shedding
- A bull that covers the bases well enough to breed the whole herd to, yet pushes the envelope with the best flush sires in the industry

CONGRESS IS IN SESSION

- Headlines a long list of Hometown sons that are becoming a cornerstone of carcass excellence in the Angus breed
- He takes the carcass value and performance genetics of Home Town to a new level though for type and kind
- His dam stacks two generations of outcross sires that have both become well known for their outstanding daughters and his grandam is recognized as one of the all-time greats from the Lady family
- Congress sired both the Reserve Champion Heifer in the Phenotype and Genotype Show as well as the Reserve Champion Carcass Steer at the 2024 National Junior Angus Show

#1 BY A WIDE MARGIN

- FIREBALL continues to exceed all expectations for performance, phenotypic quality and both commercial and seedstock marketability
- As one of the most proven sires in the business he continues to rank at the top of the heap for both carcass quality and Grid Value
- 21 of 22 FIREBALL steers in a 2022 structured progeny test graded Prime while also posting the largest ribeyes and heaviest carcass weights in a 98-head contemporary group
- Much more than a carcass sire, FIREBALL is a proven multi-trait leader that also excels for calving ease, performance, feed efficiency and PAP
- Progeny continue to be among the most consistent, complete and in demand sire groups across the country

MAKE MATINGS WITH INTENT

The ABS Lineup Through a Maternal Lens

PASTURE TO PLATE STARTS WITH THE COW

ABS understands that nothing happens in the beef business without the right maternal base. With that said, we know maternal means different things for different producers. It's about the data but also much more. Structural soundness, udder quality, cow family history, production records, and other characteristics not fully explained by an EPD are also critical components.

We've designed this year's Sire Directory to better describe some of our key maternally oriented sires. We've changed from an all-purpose perspective to a maternal perspective in highlighting EPDs on those bulls to assist you in making the best choices for your cow herd. We believe in the power of data and suggest that maternal indexes are a great place to start since they combine key maternal traits, their economic value, and associated costs.

While traditional all-purpose mating strategies have served the industry well, today there is another approach to consider. With sexed semen, producers can now implement precision breeding strategies to eliminate compromises, emphasizing more focused maternal selection on a portion of their herd while simultaneously maximizing terminal value from females not needed to produce replacements.

Maternal traits are highlighted in green based on the parameters outlined on this page or the top 35% if not specified.

Carcass merit traits and endpoint value indexes are also emphasized and highlighted in gold, as they will contribute ongoing value to future progeny.

KEY MATERNAL COMPONENTS AND CONSIDERATIONS

FERTILITY & LONGEVITY

Improve Fertility However Possible

- While low-heritable traits like fertility can be best improved through crossbreeding, they should also receive emphasis from a maternal selection standpoint.
- Heifer Pregnancy (HP) EPDs are highlighted here.

Longevity is a Key Maternal Driver

- Productive Longevity is a critical component of cowherd sustainability and profitability.
- Simmental and Red Angus offer Stayability EPDs while the Hereford breed publishes Sustained Cow Fertility (SCF).

ADAPTABILITY

Adaptability Traits Are Important

- Different environments bring different challenges and tolerances.
- Hair Shedding (HS) and Pulmonary Arterial Pressure (PAP) are traits that can have significant regional maternal importance.

Avoid Extremes for Milk

- Milk needs vary by environment, but generally, we recommend avoiding both extremes.
- The middle 60% of the population for Milk EPD is highlighted.

EFFICIENCY

Reduce Mature Size and Dry Matter Intake

- Feed costs are the largest production expense for cow-calf producers.
- Dry Matter Intake (DMI) and Mature Size (MH, MW & MCW) EPDs in the smallest 50% of the population are highlighted.

FOUNDATION TRAITS

Foot Quality and Docility Are Key

- Improved Foot Quality (Claw & Angle) and Docility (Doc) are components that favorably contribute to both producer satisfaction and cowherd longevity.

Enhance Teat and Udder Quality

- Udder quality pays dividends both in terms of convenience and longevity. The Hereford breed offers EPDs for both Udder Suspension (US) and Teat Size (TS).

Don't Compromise Maternal Calving Ease

- Overlooking Maternal Calving Ease comes with significant risk.

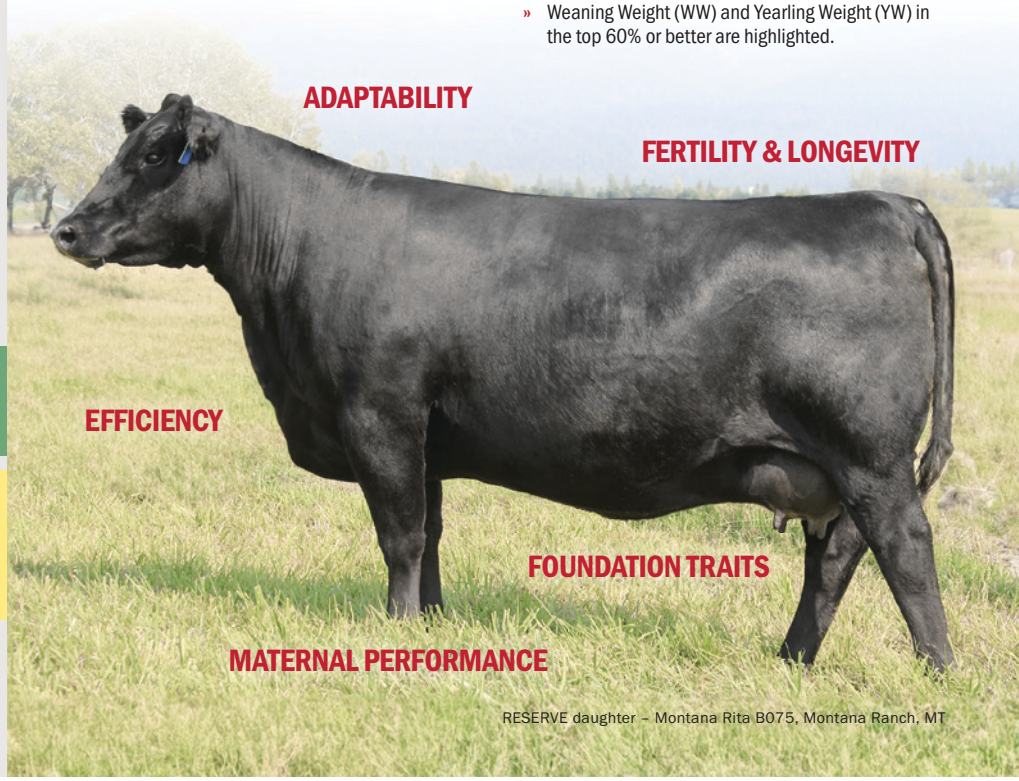

MATERNAL PERFORMANCE

Calving Ease

- While calving ease is typically only a concern when breeding heifers, we recommend a moderate and consistent emphasis on calving ease within the cowherd to avoid future problems.
- Top 35% for Calving Ease (CE) and top 50% for Birth Weight (BW) are highlighted.

Weaning and Yearling Growth

- Increased performance is generally a positive, but from a maternal perspective, it must be balanced against larger mature size and input costs.
- Weaning Weight (WW) and Yearling Weight (YW) in the top 60% or better are highlighted.

RESERVE daughter – Montana Rita B075, Montana Ranch, MT

Daughter – Tehama Mary Blackbird J341, Brumfield Angus, MI

Daughter - Myers Blackcap M202, Colby Myers, KY

Daughter - Montana Rita 2264, Tudahl Angus, MT

FAMILY STRENGTH AND DIRECTION

- This now deceased, high accuracy and high satisfaction sire has been a long-time customer favorite, earning the position as ABS' top seller in 2022, 2023 and 2024
- With a bulletproof maternal pedigree it's no surprise that PATRIARCH has earned a reputation for making highly productive and highly thought of daughters
- His daughters are keepers both in terms of their production ability and their kind
- Limited availability in Sexcel Female product only

Daughter - Zebo Blacklass 2454,
Kay Cattle LLC, OK

DYNAMIC DATA - OVERPOWERING PHENOTYPE

- Calving Ease sire that displays an overpowering physical presence with amazing base width, thickness and internal dimension wrapped up in an attractive package
- A genomic standout that continues to excel as a highly proven sire, no other bull in the breed today can touch his combined levels of Calving Ease, Birth Weight, Performance and accuracy
- Offers the same impressive performance and phenotype as his sire with significant advantages for Calving Ease, Marbling and Hair Shedding genetics
- His dam and grandam have both been stalwart, highly productive females in the Brinkley program

VITAL

VITAL INGREDIENT FOR BUILDING A COWHERD

- Big picture genetics that balance traits across all segments including cow calf, feedlot and packer
- A stylish big bodied bull that will deliver manageable calving ease with an abundance of growth and end product
- Vital's dam, 106J is a moderate, deep ribbed, correct made young cow with great feet and an ideal udder
- We expect VITAL to deliver moderate framed, sound structured and good footed progeny with an abundance of body and do-ability
- Posted his own individual PAP Score of 37

ACE IS THE PLACE FOR POWER AND PERFORMANCE

- One of the most impressive bulls in the breed today
- From the ground up, built with width, power, mass and muscle in a super sound package
- This Aviator son has more performance, growth and phenotype than his sire
- Out of an elite cow noted for excellent phenotype and maternal excellence
- Complete, no holes data package that adds up to a top 30% $Combined index

Daughter - Bullerman Abigale 1030, Bullerman Angus, MN; K & J Angus, IA & Bruns Angus Farms, SD

CALVING EASE ★★★

A STOCKMAN'S INVESTMENT

- Displays the trifecta of rancher demands - Power, Performance and Phenotype
- A super long bodied, thick ended and capacious individual that anchored the Express Ranches Champion Carload at the 2020 NWSS
- Offers less birth weight with more muscle and red meat than his sire with the same beef bull power and appeal
- Sired the $380,000 sale topping female at the 2022 Express Big Event Sale as well as the Lot 1 featured female in the 2024 sale

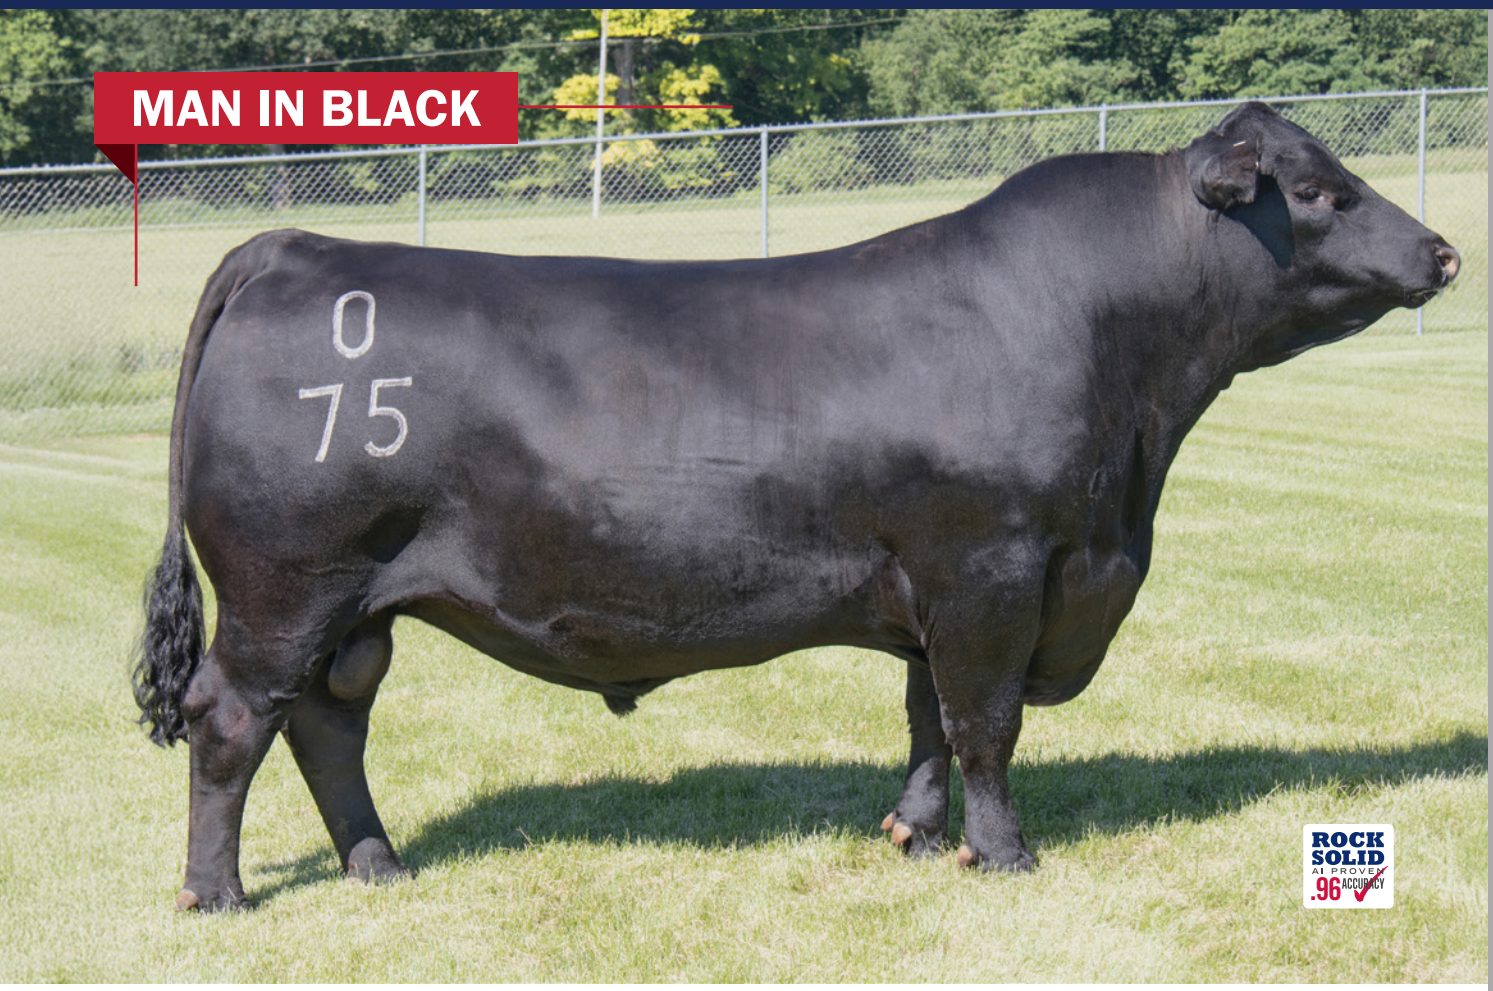

Daughter - CoX Lady Reserve 2583,
CoX Ranch, TX

Daughter - Brumfield Lady 2144, Brumfield Angus, MI

Daughter - CCM Elise 0132, Encore Cattle & Genetuics, TX

Daughter - Deer Valley Rita 26139, Deer Valley Farm, TN

THE MAN, THE PERFORMER, THE LEGEND

- A man amongst boys from a young age, combining tremendous base width and muscle with exceptional substance, rib shape and length of body
- Described by many astute cattlemen as the most powerful Angus bull they've seen in recent years
- MAN IN BLACK progeny are tearing it up with big-time performance, high breeder satisfaction and outstanding demand in sales across the country
- His unique data and imposing phenotype make for as stout and valuable of a power bull package as we know how to make

TAKE THE EXPRESS WAY TO SUCCESS

- One of the most exciting herd sire prospects ever produced at Express Ranches
- Progeny are making their mark including the $190,000 Big Event feature EXAR Princess 2717 who recently earned the 2023-204 ROV Show Heifer of the Year award
- Produced by the National Junior Show Grand Champion female EXAR Frontier Gal 3734 who has already generated $1.5 million in progeny sales
- Tremendous design—sound structured with a long, powerful neck and front end that is complimented by his depth of rib and stoutness of bone and hip

WOODFORD

THE TOP SHELF KIND

- The next step in elite, high percentage Simmental genetics poised to break out as the outcross, multipurpose sire of the year
- Has already set a name for himself capturing banners at the 2023 NAILE and 2024 Cattlemen's Congress where he was admired for his foot quality, dimension, and proportions
- Traces back to two matriarchs of the breed, TJ 22X and WHF Summer 365C. With that kind of cow power behind him and his unmatched look and quality, use him with absolute confidence
- Homozygous black, homozygous polled by parentage, 3/4 SM, 1/4 AN

Capitalize on the Best Terminal Genetics in the Business

NuEra Genetics®, ABS Global's proprietary terminal genetic line, was initiated in 2014 to improve profitability through focused terminal genetic selection. NuEra Genetics includes a composite line that has been designed as an ideal terminal solution by maximizing productivity, efficiency, and sustainability. These bulls make an excellent option for commercial beef producers that are interested in maximizing calf crop value.

NUERA GENETICS®
Efficiency | Profitability | Sustainability

GENETICS DESIGNED WITH THE END IN MIND

Since 2018, ABS has been collecting data from heifers that are not selected to stay within our donor population, but rather have been fed to harvest. On average, they **consistently exceeded industry standards for quality grade and yield.**

45% USDA PRIME

99% USDA CHOICE or better

46% USDA YIELD 1 GRADE & USDA YIELD 2 GRADE

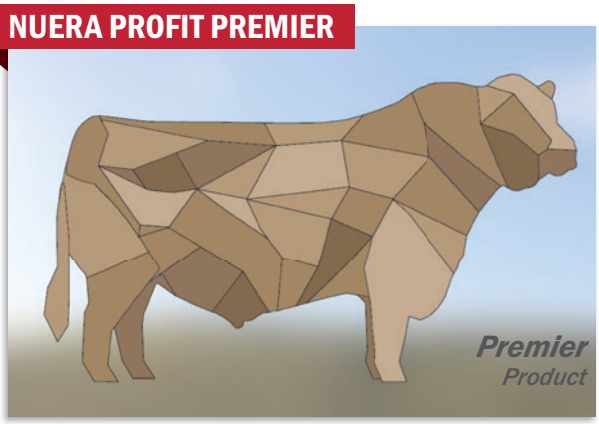

8% USDA YIELD 4 GRADE

NuEra Genetics are available in heterospermic packs that contain multiple bulls with similar elite index values. These heterospermic packs are designed to maximize terminal profitability and conception rates. Today, there are two multi-sire packs available: 29XB1057 PROFIT PREMIER and 29XB1058 PROFIT PLUS. Make matings with intent with a product line designed to perform and impact your bottom line.

A select set of NuEra Genetics are available in individual Sexcel Male product only. If your goal is to increase commercial calf crop value and pay weight, consider ABS Sexcel Male product from our exclusive NuEra program. Sexed male product will add genetic performance and value and deliver a higher percentage of more valuable male calves.

NUERA PROFIT PREMIER

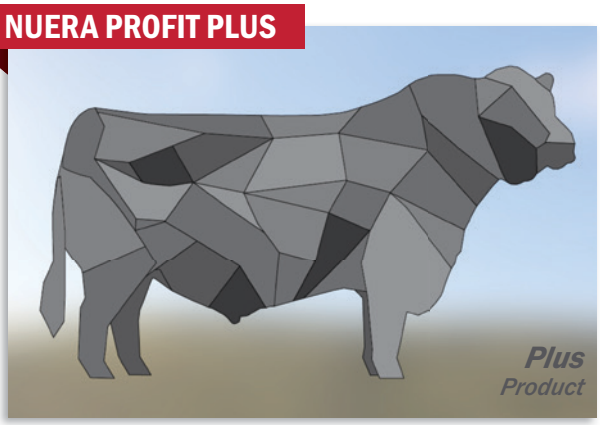

NuEra T14 PROFIT PREMIER | 29XB1057

TOP 5% US BEEF INDEX

- Heterospermic pack designed to maximize terminal profitability and conception rates. Packs include three or more NuEra sires with an average ABS US Beef Index that ranks in the top 5% or better
- Homozygous black and homozygous polled

NUERA PROFIT PLUS

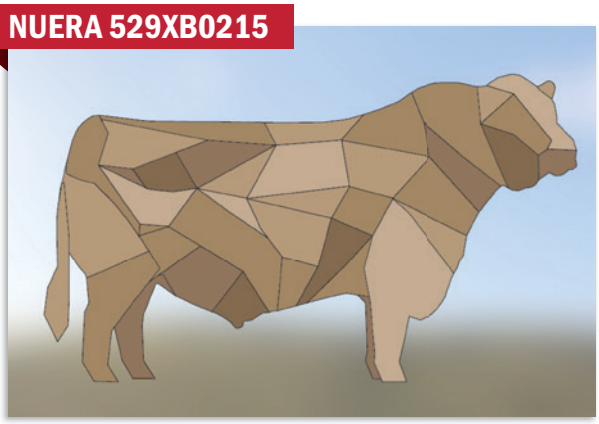

NuEra T14 PROFIT PLUS | 29XB1058

TOP 10% US BEEF INDEX

- Heterospermic pack designed to maximize terminal profitability and conception rates. Packs include three or more NuEra sires with an average ABS US Beef Index that ranks in the top 10% or better
- Homozygous black and homozygous polled

HEADLINES DEFINING A NEW ERA

WITH EVERY CHALLENGE COMES A GENETIC OPPORTUNITY

1. Rebuild your cowherd with females designed to do more with less
2. Supply upcoming demand for high-quality females
3. Create more AI-sired seedstock bulls
4. Generate more high-value steer calves

Sexcel Sexed Genetics

Leverage the power of both Sexcel® Male and Sexcel® Female in your genetic opportunity.

A WINNING COMBINATION

Sexcel® and 7 & 7 Synch Protocols

A POWERFUL REPRODUCTIVE MANAGEMENT TOOL

Several years ago, 7 & 7 synch protocol burst onto the scene as a new tool in beef cattle reproductive management. The program is touted for its remarkable ability to bring cows into estrus for Fixed-Time AI (FTAI), and conception rates are reported to be on par with, or better than, the "gold standard 7-Day Co-synch + CIDR" protocol. That said, the additional chute trip for 7 & 7 has been a deterrent for some producers. However, savvy embryo transfer programs understand that exceptional estrus response provides an opportunity to maximize the proportion of recipients receiving embryos—in turn resulting in **more high-value pregnancies**.

Using sexed semen is about controlling the gender of the resulting pregnancy and calf to create the most valuable product for your operation.

In a similar fashion, 7 & 7 synch can maximize the number of cows eligible to receive sexed semen. We know conception rates in cows receiving sexed semen improve when the female has displayed estrus by the time of insemination. Ultimately, using sexed semen is about controlling the gender of the resulting pregnancy and calf to **create the most valuable product for your operation**. The more pregnancies you can influence the better. Estrus response rates with 7 & 7 regularly exceed 80% (sometimes approaching 90%) as compared to a typical Estrus response of 60-65% for other protocols. That additional 15-20% of cows that are primed for sexed semen with 7 & 7 can make a big difference in the resulting calf crop.

IT'S NOT ABOUT CONCEPTION RATE, IT'S ABOUT THE CALVES

The most common dispute against implementing sexed semen is a reduced conception rate. While it is true that sexed semen tends to be lower fertility relative to conventional semen from the same bull, the fertility is more than acceptable. Conception rate isn't the most important metric anyway. The outcome we all care most about is our calf crop, and exceptionally high estrus response with 7 & 7 synch gives us the best opportunity to control the gender skew of that calf crop. With a little napkin math, it becomes clear that 7 & 7 gives you the opportunity to generate a calf crop with 75% or more of the desired sex. Imagine the value of converting 25% of your annual calf-crop from heifers to steers or generating 25% more heifers to fuel your herd's expansion.

AN UNEXPECTED OPPORTUNITY

Since 2020, ABS has partnered with the Bair Ranch in central Montana to demonstrate the value of pairing sexed semen with the right reproductive management tools. In 2024, our aim was to use 7 & 7 to synch all the cows to maximize our opportunity to inseminate cows with Sexcel. Mother Nature derailed those plans with heavy rains on our second group of cows, and we quickly pivoted to enrolling those cows in a 7-day CIDR program. The reproductive outcomes of those 2 groups of cows are shown in Table 1. While it is not a perfect scientific comparison, these real-world results from more than 550 cows demonstrate the power of 7 & 7 to help producers control the gender of their calf crop.

In 2025, we synchronized and bred more than 600 females in two groups at the Bair Ranch. The estrus response rates were tremendous, with nearly 90% of both groups displaying estrus by FTAI.

If you're on the fence about using sexed semen, it's worth reconsidering the opportunity that pairing Sexcel with 7 & 7 synch presents.

Table 1. Reproductive Outcomes of 2024 Bair Ranch Breeding Project

	7 & 7 SYNCH	7 DAY CO-SYNCH + CIDR
Estrus Response	88.2%	56.9%
Pregnancy Rate - Sexcel Female Semen (Estrus cows only)	54.4%	55.9%
Total Calf Crop Heifer Proportion	77.2%	63.2%

Look for the Estrus Synchronization Protols on page 114.

CALVING EASE ★★

NEW AGE IN DUAL THREAT FRANCHISE PLAYMAKERS

- MVP for added length, power and muscle with very good carcass data
- Dam is a proven producer with an old school maternal pedigree
- Masculine, large scrotal bull that should add performance and stoutness
- Strong EPDs across the page to make calves that will generate revenue

Daughter - C-T Miss Pan 4147, C-T Red Angus, MT

MOVE YOUR HERD FORWARD WITH PROPULSION

- Standout from both a data and phenotype perspective, makes attractive cattle that will smash the scales at weaning
- Big time performance with style and length to burn; you'll love the muscle, shape and phenotype he brings to the table
- Dam is a long sided female with a 108 MPPA
- One of the top proven performance bulls in the breed today, his progeny offer an excellent combination of growth and muscle shape
- He offers longevity with his progeny and makes the kind of long spined, deep sided, solid uddered daughters that you want to keep in your herd

CALVING EASE ★★★★

SLEEP UNTIL SUNRISE

- The next step in high maternal, calving ease genetics who was the standout individual at Baumgarten's 2023 sale
- His dam, D81, was a workhorse bull-making machine at Sandhill and is already doing the same at her new home. Plus, she has 12 daughters in production ratioing 102 on 27 calves
- A balanced, curve-bending sire whose first sire group has backed that up, ratioing 94 at Birth and 100 at Weaning
- Extremely deep, soft-sided bull who excels for muscle and structural quality. He is short marked, dark red, and goggle-eyed
- DNA tested homozygous polled, 100% pigment both eyes

Son - BCC Sunshine 469M, Baumgarten Cattle Co., ND

TRADEMARKED FOR QUALITY

- In a different league for adding marbling and performance, all while stemming from a proven cow line
- His marbling EPD is nearly 10x higher than breed average; his first 83 progeny ratioed 104 for IMF
- T723, his remarkable dam, continues to be a dominant generator kind in the Innisfail program
- TRADEMARK is short marked, deep dark red to the ground with a dark hoof. He's more than just a carcass sire, and the evidence is clear when you see the daughters
- DNA tested homozygous polled, 100% pigment both eyes

ON THE PROWL WITH POWER & STYLE

- A truly unique breeding piece that checks every box on paper with dominating look and kind in the pasture
- The maternal legend in the making–his dam is the famed 4038 and his MGD is 1311. His first two daughters in production have ratioed 110 on their calves
- Truly the next step in his pedigree stack to add genuine substance and power to the next generation
- A four-star calving ease bull with four-star marbling and maternal design
- DNA tested heterozygous polled, 100% pigment both eyes

ACCLAIM

KCF BENNETT ACCLAIM C442 | 29HP0930

Owned by: Knoll Crest Farm Inc. VA; ABS Global, Inc. WI

AHA 43661600
Born: 9/14/15

PERFORMANCE & PHENOTYPE

- Described as arguably the best Encore son in the business
- One of the fastest growth bulls in the breed from birth to yearling; his degree of CED and YW is nearly unmatched, especially with his level of progeny proof
- His mother is a neat uddered, feminine cow that has multiple progeny that continue to perform at all levels
- ACCLAIM is a sound structured, big bodied and big testicled bull that continues to stand the test of time
- DNA tested homozygous polled, 100% pigment both eyes

EPD	-3.3	+54	+103	+27	+334.16	+.08	-.09	+1.52	+160.11

GET THE MARBLING, KEEP MORE PROFIT

- F2 50% Wagyu, 50% Angus - Unregistered bull designed to maximize terminal value
- Unlike any Wagyu bull you've seen before, 3205 is a truly impressive mature sire that packs 2,600 lbs of marbling and muscle into an attractive, athletic and exceptionally long bodied 'beef bull' form
- The #1 Terminal Profit index bull that we know of to ever come out of the Circle A Ranch program. He also ranks highly for Maternal Profit, Marbling and Birth Weight
- Over 15 years proving the commercial value of Wagyu/Angus hybrid cattle on a large scale, Circle A identified 1/4 blood Wagyu steers as delivering more profit by hitting the sweet spot for quality without sacrificing performance compared to 1/2 bloods
- His pedigree combines the elite Wagyu sires Shigeshegetana and JVP Fukutsuru-068 while his Angus genetics include ABS maternal legends Connealy Impression, Bon View New Design 878 and H A Image Maker 0415

BEEF COW PROTOCOLS 2026

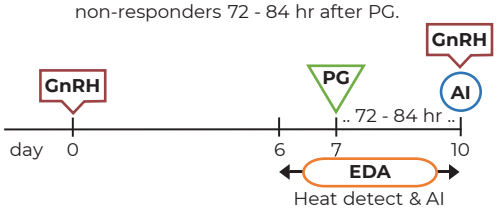

For additional synchronization protocols visit *BeefRepro.org*

HEAT DETECTION & TAI

For best results perform AI 12 ± 2 hr after detection of estrus.
Use of estrus detection aids (**EDA**) is highly recommended.

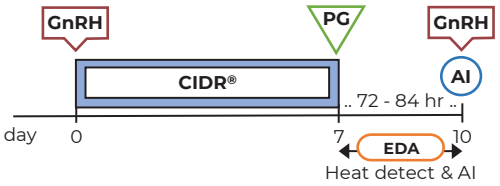

Select Synch & TAI

Heat detect & AI days 6 to 10 and TAI with GnRH all non-responders 72 - 84 hr after PG.

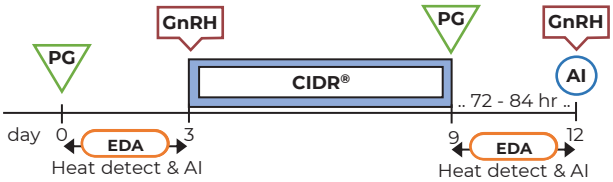

Select Synch+CIDR® & TAI

Heat detect & AI days 7 to 10 and TAI with GnRH all non-responders 72 - 84 hr after PG.

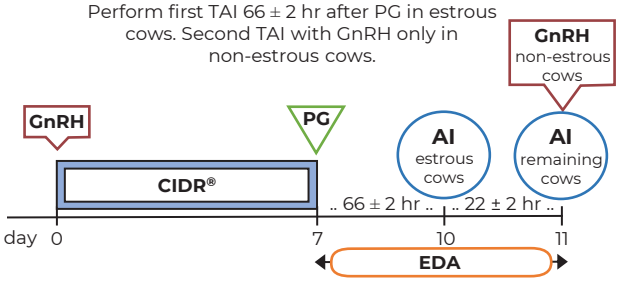

PG 6-day CIDR® & TAI

Heat detect & AI days 0 to 3. Insert CIDR + GnRH to non-responders, heat detect & AI days 9 to 12. TAI with GnRH non-responders 72 - 84 hr after PG and CIDR removal.
Protocol may be used in heifers.

7-day CO-Synch+CIDR® & Split-TAI

Perform first TAI 66 ± 2 hr after PG in estrous cows. Second TAI with GnRH only in non-estrous cows.

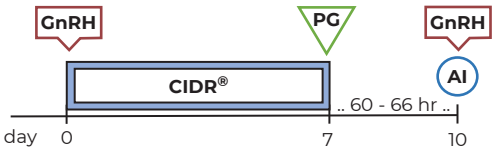

FIXED-TIME AI

Time for Fixed-time AI (**TAI**) should be considered as the approximate average time of insemination based on the number of females to inseminate, labor, and facilities.

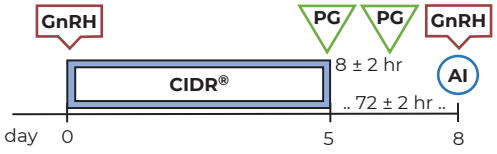

7-day CO-Synch+CIDR®

Perform TAI with GnRH at 60 to 66 hr after PG.

5-day CO-Synch+CIDR®

Perform TAI with GnRH at 72 ± 2 hr after CIDR removal.
Two injections of PG 8 ± 2 hr apart are required for this protocol.

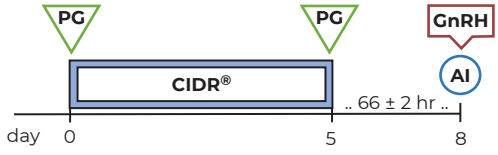

7&7 Synch

Perform TAI with GnRH at 66 ± 2 hr after CIDR removal.

Bos indicus PG 5-day+CIDR®

Perform TAI with GnRH at 66 ± 2 hr after CIDR removal.

EDA Aervoe™, AIPAint™, Detect-her™, Estrotect™, Kamar™, Mark-her™, Paintstik™, Quick Shot™, Tell Tail™, Twist-Stik™

GnRH Cystorelin®, Factrel®, Fertagyl®, OvaCyst®, GONABreed®

PG estroPLAN®, Estrumate®, Lutalyse®, Lutalyse® *HighCon*, ProstaMate®, SYNCHSURE™

HEAT DETECTION & TAI

For best results perform AI 12 ± 2 hr after detection of estrus.
Use of estrus detection aids (**EDA**) is highly recommended.

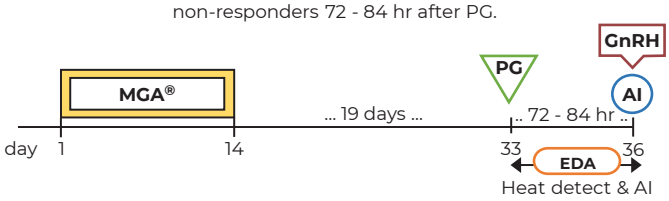

Select Synch+CIDR® & TAI

Heat detect & AI days 7 to 10 and TAI with GnRH all non-responders 72 - 84 hr after PG.

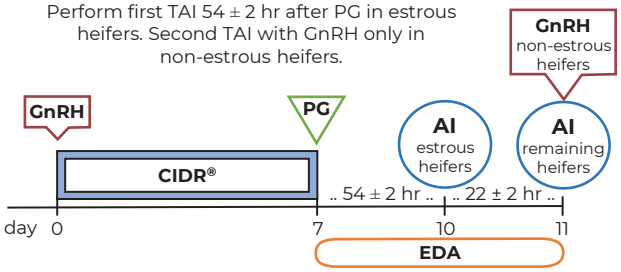

MGA®-PG & TAI

Heat detect & AI days 33 to 36 and TAI with GnRH all non-responders 72 - 84 hr after PG.

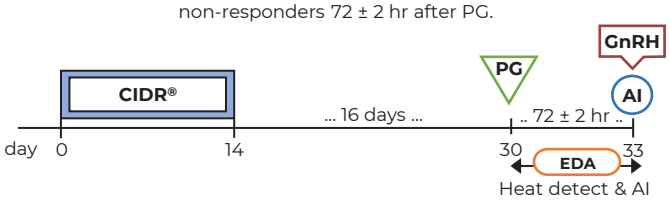

7-day CO-Synch+CIDR® & Split-TAI

Perform first TAI 54 ± 2 hr after PG in estrous heifers. Second TAI with GnRH only in non-estrous heifers.

14-day CIDR®-PG & TAI

Heat detect & AI days 30 to 33 and TAI with GnRH all non-responders 72 ± 2 hr after PG.

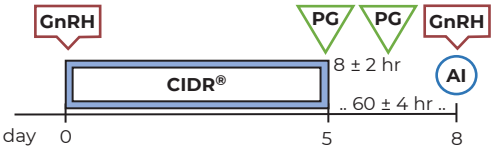

FIXED-TIME AI

Time for Fixed-time AI (**TAI**) should be considered as the approximate average time of insemination based on the number of females to inseminate, labor, and facilities.

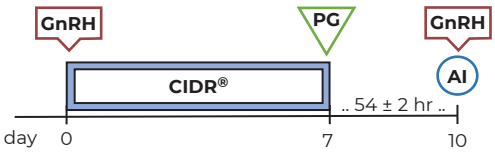

5-day CO-Synch+CIDR®

Perform TAI at with GnRH 60 ± 4 hr after CIDR removal.
Two injections of PG 8 ± 2 hr apart are required for this protocol.

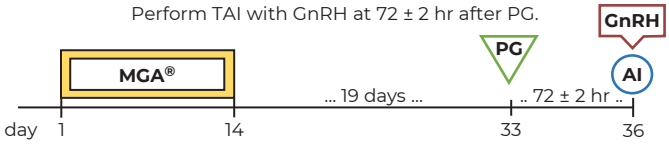

7-day CO-Synch+CIDR®

Perform TAI with GnRH at 54 ± 2 hr after PG.

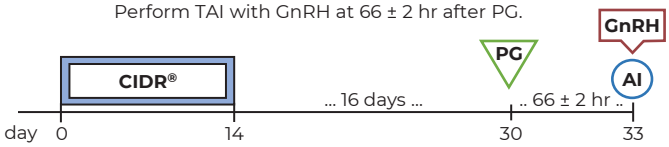

MGA®-PG & TAI

Perform TAI with GnRH at 72 ± 2 hr after PG.

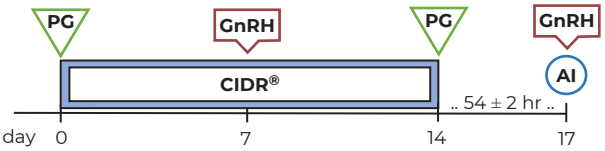

14-day CIDR®-PG & TAI

Perform TAI with GnRH at 66 ± 2 hr after PG.

7&7 Synch

Perform TAI with GnRH at 54 ± 2 hr after CIDR removal.

SEXED SEMEN PROTOCOLS 2026

For additional synchronization protocols visit *BeefRepro.org*
Use of sexed semen can result in conception rates that are decreased compared to conventional semen used in the same situation

HEAT DETECTION

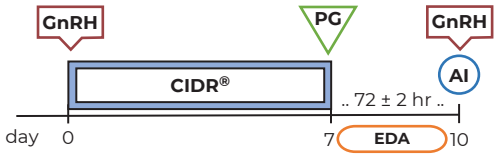

Sexed semen can be used on any female observed in estrus (heat) and following synchronization with any protocol on the Cow or Heifer Protocol Sheet.
For best results with sexed semen *perform AI 16 to 22 hr* after detecting female in estrus.
Use of estrus detection aids (**EDA**) is highly recommended.

FIXED-TIME AI

Time for Fixed-time AI (**TAI**) should be considered as the approximate average time of insemination based on the number of females to inseminate, labor, and facilities.
To optimize pregnancy success, it is recommended to *use sexed semen on females that have exhibited estrus before TAI* and conventional semen on females that have not exhibited estrus.

HEIFERS ONLY
7-day CO-Synch+CIDR®

Perform TAI with GnRH at 72 ± 2 hr after PG.

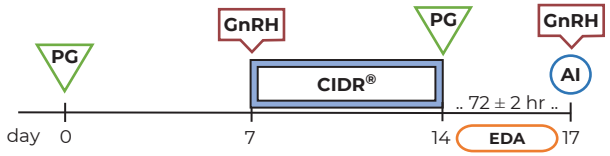

COWS
7&7 Synch

Perform TAI with GnRH at 66 ± 2 hr after CIDR removal. *All cows can also be inseminated with either sexed or conventional semen.*

HEIFERS ONLY
PG-7 7-day CO-Synch+CIDR®

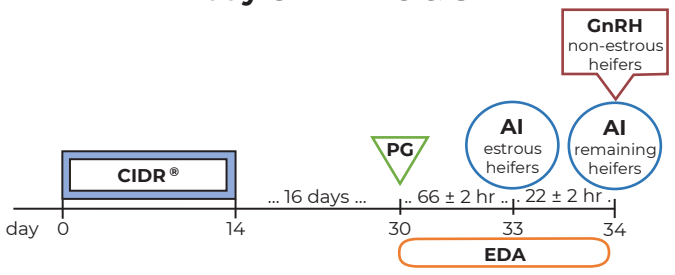

Perform TAI with GnRH 72 ± 2 hr after second PG. *All heifers can also be inseminated with either sexed or conventional semen.*

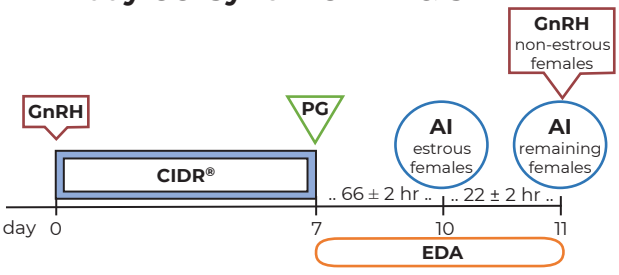

SPLIT-TIME AI (STAI)

Perform first TAI 66 ± 2 hr after PG in estrous females. GnRH administered at second TAI only in non-estrous females. Females detected in estrus by first or second TAI receive sexed semen. Females not in estrus receive conventional semen at second TAI.

HEIFERS ONLY
14-day CIDR®-PG & STAI

COWS & HEIFERS
7-day CO-Synch+CIDR® & STAI

EDA Aervoe™, AIPAint™, Detect-her™, Estrotect™, Kamar™, Mark-her™, Paintstik™, Quick Shot™, Tell Tail™, Twist-Stik™

ABS Beef Terms & Conditions

The Terms govern the purchase, sale, and use of all bovine related products and services offered by ABS Global, Inc. or its affiliates ("ABS"), including without limitation: semen, sexed semen, embryos, and bovines; ("Germplasm"); Breeding Services; Genetic Services; udder care products; breeding certificates; and equipment or supplies related to any of the above (collectively, with the Germplasm, Breeding Services, and Genetic Services, the "Products") and of first-generation progeny made from Germplasm ("Progeny"). Please read these Terms carefully, as your use or purchase, or your employees' or representatives' use or purchase (collectively or individually, "you"), of the Products and Progeny constitutes your confirmation and agreement be bound by these Terms.

1. **USE**. Products are approved for animal agriculture use only. You may not export Products or distribute, sell, or transfer Products to any third-party without the express written consent of ABS. You agree to only use Germplasm, in whole or in part, in animals wholly owned or controlled by you in the ordinary course of business. You may not without the prior written consent of ABS: reverse engineer, genotype, sequence, clone, reverse sort, genome edit, analyze or manipulate the Germplasm; or use Germplasm or the genetic materials contained in or derived from the Germplasm or Progeny, including any semen, oocytes, embryos, DNA, RNA, protein or other molecular or hereditary materials ("Genetic Materials") for any research or development use, including in public or private research programs. Sexed semen may be used solely for single artificial insemination of a single bovine, with the intent to produce a single offspring. All rights in Germplasm and Progeny not expressly granted under this Section 2 are reserved by ABS and all other uses are strictly prohibited without ABS' prior written consent.

BEEF PROGENY:

(i) NuEra Germplasm (sold as NuEra® or InFocus®) may only be used to create a terminal crossbred Progeny (beef x dairy or beef x beef cross) that is sold, marketed, leased, traded, or otherwise transferred into the beef supply chain for the purpose of slaughter.

(ii) All other ABS beef germplasm may be used to create progeny that can be used or sold for any purpose, including as breeding stock or terminal animals.

2. **WARRANTIES AND LIABILITY.** ABS warrants that Germplasm, udder care products, breeding certificates, and equipment and supplies sold by ABS conform to the description on the individual Product package and the Breeding Services and Genetics Services will be performed with reasonable skill in accordance with generally acceptable industry standards. Except as otherwise set out in these Terms, all Products are provided by ABS **"AS IS". EXCEPT FOR THE WARRANTY SET FORTH IN THIS SECTION, ABS MAKES NO WARRANTY WHATSOEVER WITH RESPECT TO THE PRODUCTS OR THE PROGENY, INCLUDING ANY (A) WARRANTY OF MERCHANTABILITY; (B) WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE; OR (C) WARRANTY AGAINST INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS OF A THIRD PARTY; WHETHER EXPRESS OR IMPLIED BY LAW, COURSE OF DEALING, COURSE OF PERFORMANCE, USAGE OF TRADE OR OTHERWISE. WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, ABS SPECIFICALLY DISCLAIMS ANY WARRANTY (A) OF THE GENETIC MAKE-UP OF THE PRODUCT OR THE PROGENY; (B) OF THE PERFORMANCE OF THE PRODUCT, OR THE CHARACTERISTICS OR PERFORMANCE OF THE PROGENY; (C) OF THE ABSENCE OF PATHOGENS FROM THE PRODUCT; AND (D). THAT PRODUCT DESCRIPTIONS, MARKETING MATERIALS, WEBSITE CONTENT, OR OTHER INFORMATION RELATED TO THE PRODUCTS IS ACCURATE, COMPLETE, RELIABLE, CURRENT, OR ERROR-FREE. YOUR EXCLUSIVE REMEDY FOR ABS' BREACH OF ITS WARRANTIES UNDER THESE TERMS IS, AT ABS' DISCRETION, REPLACEMENT, REPERFORMANCE, OR AN ACCOUNT CREDIT FOR THE DEFECTIVE PORTION OF THE PRODUCT.**

The warranty described herein is contingent upon your proper use of the Products in compliance with any product manuals or instructions, industry standards, these Terms, and any reasonable instructions from ABS in respect to the return or destruction of defective Products. These warranties do not cover any Products which have been modified in any manner or subject to abuse, neglect, misuse or alteration.

3.**LIABILITY DISCLAIMER: ABS, ITS AFFILIATES, AND THEIR EMPLOYEES, OFFICERS, DIRECTORS, AND DISTRIBUTORS ("ABS PARTIES") ENTIRE LIABILITY ON ANY CLAIM ARISING FROM OR RELATED TO THE PRODUCTS OR PROGENY (WHETHER FROM BREACH OF WARRANTY, CONTRACT, TORT, STRICT LIABILITY, NEGLIGENCE, OR FIDUCIARY DUTY) SHALL NOT EXCEED THE PURCHASE PRICE PAID TO ABS FOR THE PRODUCTS THAT ALLEGEDLY CAUSED THE LOSS, OR IF ABS SO ELECTS, REPLACEMENT OF THE PRODUCT. IN NO EVENT SHALL ANY ABS PARTY BE LIABLE FOR INCIDENTAL, PUNITIVE, EXEMPLARY, CONSEQUENTIAL, MULTIPLIED DAMAGES OR LOST PROFITS SUSTAINED BY YOU OR ANY OTHER PERSON, OR FOR ANY FAILURE OF COWS TO CALVE. YOU AGREE NOT TO ASSERT ANY NON-CONTRACTUAL CLAIM UNDER STATE LAW ARISING FROM OR RELATED TO YOUR PURCHASE OR USE OF ANY PRODUCT. YOU ASSUME ALL RISK AND LIABILITY ARISING FROM OR RELATED TO YOUR USE, HANDLING, OR STORAGE OF PRODUCTS OR RELATED TO DEFECTS IN ANY STORAGE CONTAINERS OR TANKS CONTAINING PRODUCTS.**

4. **LIQUID NITROGEN NOTICE**: You shall transfer all Germplasm from shipping tanks to your own nitrogen tanks immediately upon receipt. You are responsible for providing and maintaining liquid nitrogen tanks, including nitrogen levels and tank operation at all times. ABS may provide liquid nitrogen services to customers as an ancillary service. Such services are provided on an "AS IS" and "AS AVAILABLE" basis. Without limiting the foregoing, the ABS Parties shall not be responsible for any loss and/or damages, direct or indirect, arising out contract, tort, or fiduciary duty by providing liquid nitrogen to you. To the extent allowable by law, all liability for the supply, maintenance, or servicing of liquid nitrogen storage tanks is expressly disclaimed by ABS Parties.

5. **DISTRIBUTORS**. ABS contracts with independent contractors, sales agents, authorized representatives, or other distributors ("Distributors") from whom you may purchase Products directly. Distributors are not the agents, employees, or servants of ABS and are not authorized to contract for, or on behalf of, ABS. ABS does not control the Products after transfer to a Distributor, and disclaims all liability for the Products, services, actions, or work provided to you by Distributors.

6. **INDEMNITY**. You agree to defend, indemnify and hold all ABS Parties harmless from any and all claims, liabilities, damages, costs and expenses, including reasonable attorneys' fees, in any way arising from, related to or in connection with (a) your use of ABS Products; (b) your breach or alleged breach of these Terms; (c) your violation of any third-party right, including any intellectual property, confidentiality, property, or privacy right; (d) your violation of any laws, rules, regulations, codes, statutes, ordinances or orders of any governmental and quasi-governmental authorities, including all regulatory, administrative and legislative authorities; and (e) any misrepresentation made by you.

7. **MODIFICATION**. ABS may revise these Terms from time to time and will post the most current version on our website. You are bound by any revision and should review these Terms periodically. If any provision of these Terms is deemed invalid, void, or unenforceable for any reason, that provision shall be severed and shall not affect the validity or enforceability of any remaining provision, and the parties shall substitute for the invalid provision a provision that most closely approximates the intent and economic effect of the invalid provision.

Estrus Synchronization Drugs
FOR YOUR BEEF OPERATION

The three most used hormones are gonadotropin-releasing hormone (GnRH), progesterone, and prostaglandin F_{2a} (PG), and each of them has a **very specific purpose**. Thus, administering the correct estrus synchronization drug on **the correct day of your protocol is critical**. Learn more about these hormones and the corresponding products in the marketplace.

GONADOTROPIN-RELEASING HORMONE (GNRH)

GnRH is used to stimulate the ovulation of a follicle and the formation of a new follicular wave. It is administered at the **beginning or middle** of a protocol to **stimulate the ovulation of a follicle, so a new, synchronized follicular wave can begin**. Giving GnRH again at the **time of artificial insemination (AI) stimulates ovulation**, so **an egg can be released** to become fertilized by the deposited sperm cells.

If GnRH is accidentally administered instead of PG at CIDR removal, the females that respond to it **will not have an egg available for fertilization** at the appropriate time for AI.

GNRH PRODUCTS, HOW TO ADMINISTER, AND STORAGE

There are 5 GnRH products on the market: **Cystorelin, Factrel, Fertagyl, GONABreed, and OvaCyst**. All these products are administered in 2 mL doses except for GONABreed, which is administered in a 1 mL dose. These GnRH products need to be **administered intramuscularly**, so make sure that you are using the **correct needle length (1.5 inches)**. Ensure you **read the label** and store GnRH products under the correct conditions, as **some need to be refrigerated and others stored at room temperature**.

PROGESTERONE

Progesterone is administered as a **controlled internal drug release (CIDR) insert** or is fed as **melengestrol acetate (MGA) at a rate of 0.5 mg/head/day**. During the estrus cycle, the corpus luteum forms at the sight of a ruptured follicle and will begin to release progesterone. Due to the elevated concentrations of progesterone, the female will not come into heat and will not ovulate.

The use of progesterone is recommended during estrus synchronization of cows and heifers as it can help **kick-start cyclicity in non-cycling females**.

PROGESTERONE PRODUCTS AND THEIR AFFECTS

In the context of estrus synchronization, we use exogenous progesterone (via a CIDR or MGA) to **mimic the effect of the corpus luteum** and inhibit females from **coming into heat before the desired time**. Once we remove the CIDR insert or stop feeding MGA, concentrations of progesterone will drop, and the female will be able to come into heat.

ESTRUS SYNCHRONIZATION REQUIRES TIME, EFFORT, AND FINANCIAL INVESTMENT, SO ENSURE SUCCESS BY:

- Sticking to the estrus synchronization protocols recommended by the Beef Reproduction Task Force
- Administering the correct drug on the correct day
- Using the correct needle length for the intended route of administration (1 inch for subcutaneous administration and 1.5 inch for intramuscular)
- Storing your estrus synchronization hormones as recommended by the manufacturer

PROSTAGLANDIN F_{2a} (PG)

Prostaglandin F_{2a} is used to **break down a corpus luteum that may be present on the ovary**. When a corpus luteum is present, it produces progesterone, which inhibits a female from coming into heat and ovulating. Therefore, by administering PG a few days prior to AI, we can break the corpus luteum down and reduce circulating concentrations of progesterone. This allows the female to come into heat and ovulate.

PG PRODUCTS, HOW TO ADMINISTER, AND STORAGE

There are 6 PG products on the market: **estroPLAN, Estrumate, Lutalyse, Lutalyse HighCon, ProstaMate, and SYNCHSURE**. Lutalyse and ProstaMate are administered in 5 mL doses, whereas the other products are administered in 2 mL doses.

These PG products are administered intramuscularly, except for Lutalyse HighCon, which can be administered either intramuscularly or subcutaneously. Again, it is very important **to read the drug label and store your PG under the correct conditions**.

If PG is accidentally administered in place of GnRH at the start of a protocol, a new follicular wave **will not be initiated in a synchronized manner** and a suitable follicle **may not be present at AI**. If PG is administered instead of GnRH at AI, there likely **won't be a corpus luteum for it to respond to** and certain females may **not ovulate spontaneously in time to be fertilized** by the sperm cells deposited. If pregnant cows or heifers are injected with PG, **they may abort, depending on the stage of gestation**. Therefore, **ONLY administer PG to non-pregnant females**.

SEMEN QUALITY

Semen quality and sire health standards have always been a primary focus at ABS to insure that our product consistently delivers the best results and bio-security possible.

ABS has always been a leader in semen quality having assisted in the development of many of the techniques and protocols that are widely used in the industry today. More than 60 years of research have allowed ABS to develop processes and standards for semen production and processing that exceed industry norms.

In addition, to protect the health and well being of the ABS bull population and provide our customers with the highest level of bio-security possible, ABS' sire health standards exceed CSS minimum requirements. The vast majority of the beef semen marketed by ABS meets these stringent health and semen quality requirements and is classified as ABS normal **PRIME** quality.

SEMEN QUALITY

- Influences fertility and conception rates achieved
- Determined by the processes employed and standards used in evaluating accepted semen including semen morphology & motility
- ABS utilizes processes and standards for semen production and evaluation that exceed industry norms

HEALTH REQUIREMENTS

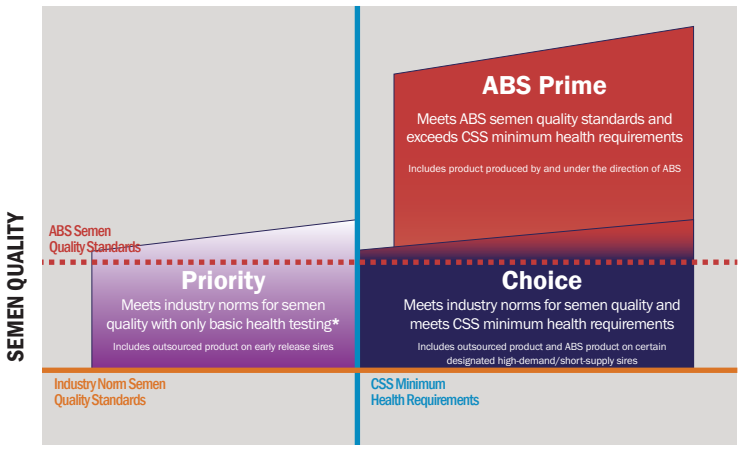

- Designed to protect the health of the herd in which semen is used by minimizing the risk of disease transmission
- CSS Certified Semen meets Certified Semen Services minimum requirements for disease control of Semen Produced for AI
- All Prime and Choice semen marketed by ABS exceeds CSS minimum requirements

If requested, other quality levels may be available on certain bulls including:

CHOICE quality product of outsourced and certain high demand sires produced at ABS. This semen may not fully meet ABS' normal PRIME semen quality standards but is within industry normal ranges and is fully CSS health qualified.

PRIORITY semen will be available on a request only basis on certain early release bulls. Like much of the custom collection semen used in the U.S., this product has not had full health testing to meet CSS minimum standards. It is designed for producers that are interested in getting the earliest possible semen from high demand sires.

BEEF SEMEN PRODUCED & USED IN THE U.S.

Priority bulls have basic health testing for the diseases monitored by CSS but have not yet been subjected to the multiple tests or full quarantine required for CSS Certification
